Подвеска признаки износа

Рулевая тяга

- При повороте руля ощущается люфт, стук
- Автомобиль сложнее удерживать на скорости
- Повышенный износ шин

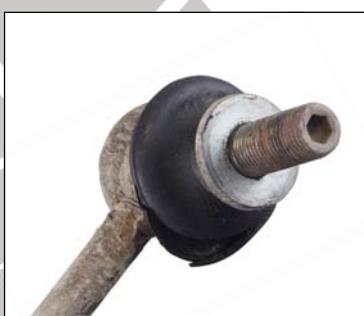

Рулевой наконечник

- Нарушено схождение передних колес
- Стуки на неровностях

Шаровая опора

- Нестабильность в управлении, нужно часто подруливать
- Вибрация или стук во время движения

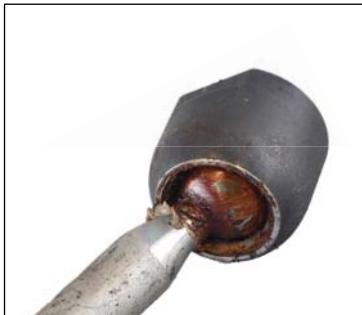

Стойка стабилизатора

- Навязчивый стук, усиливающийся при движении по неровной дороге

Steering visual inspection

Rack end

- Feels loose when driving
- Control of car is harder
- Increased tire wear

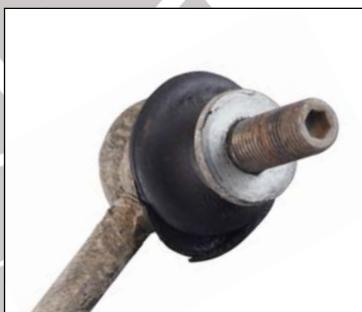

Tie rod end

- Front wheel is misaligned
- Knocking noise on road bumps

Ball joint

- Clicking noise occurs while turning the steering at standstill
- Vibration is felt on the steering wheel

Stabilizer link

- Noise is generated when driving through bumpy road

ВОПРОСЫ и ОТВЕТЫ

ДЛЯ ЧЕГО НУЖНЫ ШАРНИРЫ В ПОДВЕСКЕ?

#1

Рулевые тяги и наконечники - необходимые элементы для обеспечения точности рулевого управления и плавной работы подвески. При помощи взаимного перемещения тяги и наконечника происходит регулировка схождения передних колёс.

Шаровые опоры - элемент направляющего аппарата подвески современных автомобилей.

Применяются в конструкциях с управляемыми колесами, позволяя совмещать поворот колес и демпфирование неровностей дороги.

Стойки стабилизатора поперечной устойчивости передают усилие перемещения от колеса на торсионный упругий элемент. Обеспечивают снижение кренов при маневрах. Подвержены высоким нагрузкам.

QUESTIONS & ANSWERS

WHAT ARE STEERING AND SUSPENSION PARTS?

Q1

Steering parts are the joints between the steering unite/rack and the wheel hub. This is used to help control the angle of the steering part when moving left or right. Also it is used to adjust the toe in/out for camber alignment of the front wheel.

Ball joints are elements of the suspension guide control of modern cars. They are used in constructions with steerable wheels, allowing to combine wheel turning and damping of road roughness.

Stabilizer links transfer the force of movement from the wheel to the torsion elastic element. Provides a reduction in roll during maneuvers. Are subject to high loads.

#2

КАКИЕ ДЕТАЛИ ПОДВЕСКИ KYB В ЭТОМ КАТАЛОГЕ?

Рулевые наконечники

широко используются в рулевом управлении реечного типа, а также в рулевых трапециях.

Рулевой наконечник - это последний по счёту элемент рулевого механизма, передающий управляющее усилие от рулевой тяги на поворотный кулак.

Рулевые наконечники испытывают максимальные нагрузки среди деталей рулевого управления и обычно первыми нуждаются в замене.

Рулевой наконечник

Шаровая опора

Шаровые опоры являются подвижными соединениями в подвеске с управляемыми колесами. Шаровая опора состоит из шарового пальца и корпуса, в котором он закреплен. Шарниры KYB производятся с применением POM-технологии (ацеталь) и не требуют обслуживания. Максимальная прочность достигается при минимальных потерях на трение.

Рулевая тяга

Стойка стабилизатора

Рулевые тяги связывают рулевой механизм (рейку, редуктор или маятниковый рычаг) и рулевой наконечник. Главная задача рулевых тяг - надежно передавать осевые нагрузки, обеспечивая уверенное управление.

Стойки стабилизатора соединяют колесо со штангой стабилизатора поперечной устойчивости. Наиболее часто заменяемые детали подвески современного автомобиля, который используется на неровных дорогах.

Q2

WHICH KYB STEERING AND SUSPENSION PARTS ARE REPRESENTED IN CATALOG

Tie rod end is widely used on the rack & pinion steering system and also on the steering box type.

The rod end is the last element of the steering gear, transferring the steering force from the steering rack end to the steering knuckle. Rod ends undergo the highest load among steering parts and are usually the first to need replacement.

Tie rod end

Ball joint

Ball joints are movable joints in a suspension with steerable wheels. The ball joint consists of a ball pin and a housing in which it is fixed.

KYB joints are manufactured using POM technology and are maintenance-free. Maximum strength is achieved with minimum friction losses.

Rack end

Rack end is a component attached to the rack and pinion or steering rack. The function of the rack end is to absorb road condition in order to maintain vehicle handling.

Stabilizer link

Stabilizer link is a component of the suspension system which connects a sway bar to a shock absorber. The most commonly replaced suspension part of cars that are used on rough roads.

#3

КАКИЕ ТИПЫ ШАРНИРОВ СУЩЕСТВУЮТ?

1. Металл - Пластик

Характеристика: плавность хода и комфорт движения, необслуживаемые, подходят для большинства современных легковых автомобилей.

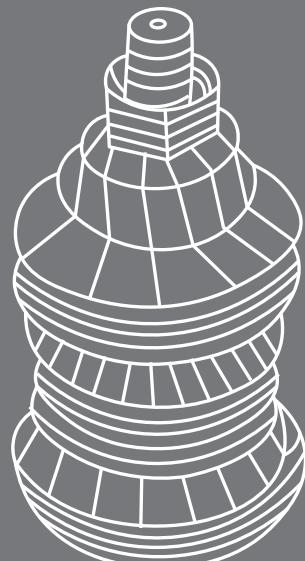

2. Металл - Металл

Характеристика: устойчивость к высоким температурам и экстремальным нагрузкам, но требуется смазка каждые 3-6 месяцев.

#4

ЧТО ТАКОЕ ШАРОВОЙ ПАЛЕЦ?

Шаровой палец - главный элемент шарового шарнира. Шаровые пальцы подвергаются высоким нагрузкам при работе подвески, особенно в районе шейки (переход сферы в вал). Качественные шаровые пальцы фрезеруются из единой заготовки, а твердость и шероховатость поверхности сферы обеспечивают плавное скольжение без образования трещин, эрозии и подклинивания. Трение в шарнире снижено за счёт высокой точности подгонки деталей и специальной смазки, заложенной при производстве.

Q3

HOW MANY TYPE OF BALL JOINT?

1. Metal to Plastic:

Advantage : Smooth and comfortable, maintenance free and covers a wider range application

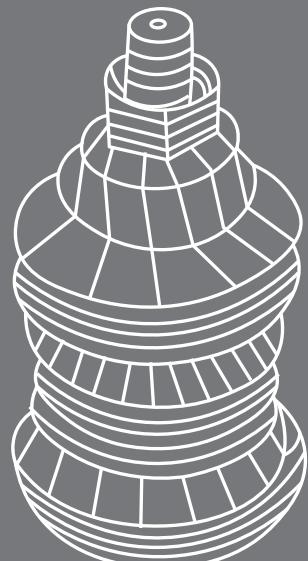

2. Metal to Metal:

Advantage : Durable to high temperature, Heavy Duty, but maintenance must be done by greasing every 3 or 6 months

Q4

WHAT IS A BALL STUD?

Ball studs are subjected to high force and stress, especially on its neck. Good quality ball studs should be designed with a one piece body and the surface/hardness of the ball should be allowed to glide to avoid cracking, abrasion, and adhesion. Friction in joint is reduced due to the high accuracy of fitting parts and special grease used on production line.

КАК ПРОВЕРИТЬ ИСПРАВНОСТЬ ШАРНИРОВ?

#5

Шаг 1: Поднимите автомобиль на домкрате, либо с помощью подъемника.

Шаг 2: Возьмитесь за переднее колесо в положении 3 и 9 часов. Энергично раскачивайте колесо вокруг вертикальной оси. Если почувствуете люфт или услышите стук - это верный признак износа рулевого наконечника или рулевой тяги.

Шаг 3: Возьмитесь за переднее колесо в положении 6 и 12 часов. Энергично, с усилием, раскачивайте колесо вокруг горизонтальной оси. Если почувствуете люфт или услышите стук - пришла пора заменить шаровую опору.

Важно! Можно попросить помощника нажать на тормоз во время проверки, чтобы исключить люфт ступичного подшипника. После проведения экспресс-теста отправьтесь на СТО для вынесения окончательного вердикта.

#6

КАКИЕ ЕСТЬ ВНЕШНИЕ ПРИЗНАКИ ИЗНОСА ШАРНИРНЫХ ДЕТАЛЕЙ?

Повреждение пыльника шарнира - верный признак скорой поломки. Попадание воды и грязи внутрь вызывает быстрый выход этих деталей из строя.

HOW TO INSPECT STEERING PARTS?

Q5

Step 1 : To inspect the steering parts, lift the car with a Jack.

Step 2 : Place your hands on the tire at the 9 and 3 o'clock positions. Then push and pull the tire rapidly around vertical axis. If you feel looseness on its movement or hear knocking, it is a sign to replace tie rod end or rack end.

Step 1 : To inspect the ball joint, lift the car with a Jack.

Step 3 : Place your hands on the tire at the 6 and 12 o'clock positions. Then push and pull the tire rapidly around horizontal axis. If you feel looseness on its movement or hear knocking, it is a sign to replace ball joint.

Q6

HOW TO MAKE VISUAL INSPECTION OF JOINTS?

Damage to the dust cover of the joint is a sure sign of imminent breakdown. The ingress of water and dirt inside the joint causes a quick failure of these parts.

#7

ДИАГНОСТИКА В ДВИЖЕНИИ

ВЫЯВЛЯЕМ ПРОБЛЕМЫ ПРИ ВИЗИТЕ НА СЕРВИС

Износ шаровых опор в движении легче всего диагностируется при езде по дороге с поперечными волнами или при проезде искусственных неровностей. В таком режиме будет возникать глухой стук, усиливающийся с увеличением амплитуды работы подвески. Однозначная рекомендация к замене опоры выдается при повреждении пыльника, ведь даже в отсутствие других признаков износа остаточный ресурс детали невозможно спрогнозировать.

Проблемы с рулевыми наконечниками или тягами проще всего выявить, вращая руль, стоя на месте. Выверните руль до упора, проверьте на люфт и стуки, покачивая руль влево/вправо, сделайте полоборота в противоположную сторону и повторите проверку. Пройдите весь диапазон вращения. Износ рулевого наконечника может также проявляться стуками, более заметными по одному борту автомобиля. Внимательно осмотрите пыльники - не допускаются даже маленькие трещины!

Стойки стабилизатора лучше всего проверять на плохой дороге - неисправные проявят себя характерным навязчивым стуком, отдающимся в кузов. Состояние пыльников особенно важно для этих компактных, но высоконагруженных шарниров.

Q7 VEHICLE SELF-INSPECTION!

DIAGNOSING STEERING AND SUSPENSION PROBLEM!

Ball joint wear is most easily diagnosed when driving on a road with shear waves or when passing speed bumps. In this mode there will be a dull knock, increasing with an increase in the amplitude of the suspension. It is highly recommended to replace the joint if the boot is damaged, because even in the absence of other signs of wear, the residual life of the part cannot be predicted.

Problems with steering rack ends or tie rods are most easily diagnosed by turning the steering wheel while car standing still. Turn the steering wheel all the way, check for play and knocks by swinging the steering wheel left / right, make a half turn in the opposite direction and repeat the check. Go through the full rotation range. A worn tie rod can also show up as knocks, which are more noticeable on one side of the vehicle. Examine the dust covers carefully - even small cracks are not allowed!

It is best to check the stabilizer links on a bad road - faulty ones will show themselves with a thud thumping into the car body.

The condition of the dust covers is especially important for these compact but highly loaded joints.

#8

МОЖНО ЛИ ИСПОЛЬЗОВАТЬ МОЛОТОК ДЛЯ МОНТАЖА?

Разрешается использовать резиновый молоток (киянку) для снятия/установки шаровых шарниров.

Внимание! Использование металлических молотков и кувалд при работе с шаровыми шарнирами запрещено.

#9

ЗАКЛАДЫВАТЬ ЛИ ДОПОЛНИТЕЛЬНУЮ СМАЗКУ ПРИ УСТАНОВКЕ? (КАЖЕТСЯ, ЕЁ МАЛО)

Нет, используемые в шарнирах KYB смазочные материалы эффективно снижают трение и вытесняют влагу. Высокая точность сопряжения поверхностей в шарнире делает смазку в первую очередь защитой от влаги и коррозии. Переизбыток смазки или её химическая несовместимость с используемыми материалами может вывести из строя пыльник, что приведет к попаданию воды и грязи внутрь и ускоренному износу шарнира.

В шарниры KYB при производстве уже заложено необходимое количество смазки.

Q8 HOW TO USE HAMMER TO INSTALL A BALL JOINT/BALL STUD?

Use rubber hammer/mallet to remove and install the ball stud.

Caution! To avoid the deformation of ball stud, do not hit on top of the ball stud and do not use a common hammer.

Q9

DO I NEED TO PUT ADDITIONAL GREASE WHEN INSTALLING? SEEMS NOT ENOUGH.

No, grease used in KYB joints effectively reduce friction and displace moisture. The high precision of mating surfaces in the joint makes the grease primarily a protection against moisture and corrosion. An excess of grease or its chemical incompatibility with the materials used can damage the boot, which will lead to the ingress of water and dirt inside and accelerated wear of the joint.

The required amount of grease is already included in the KYB joints during production. 16

Использование каталога

Информация, представленная в данном каталоге (включая кроссы на оригинальные номера) предназначена для использования только в странах Таможенного союза (Армения, Белоруссия, Казахстан, Киргизия, Россия). В каталоге представлены как автомобили с левым рулем, так и праворульные автомобили, произведенные для внутреннего рынка Японии (такие модели отмечены буквами JDM после названия бренда).

Данные по применимости артикулов KYB по маркам, моделям и комплектациям автомобилей приведены справочно, корректность подбора артикула KYB необходимо обязательно проверять по указанным в каталоге и кросс-листах оригинальным номерам. При расхождении информации о применимости артикула KYB по марке/модели и оригинальному номеру, приоритет имеет оригинальный номер. Подбор артикула KYB считается также корректным, если марка, модель или конкретная комплектация автомобиля не прописана в каталоге, но информация о кроссировании артикула KYB на оригинальный номер, подобранный для автомобиля, присутствует в каталоге или кросс-листах. **Подбор артикула KYB только по марке, модели и комплектации (без проверки оригинального номера) не является корректным.**

Варианты указания артикула KYB в каталоге (примеры):

KTR1105	53540SWAA01 53540SWAA02	Для данной комплектации артикул KYB подходит, если на автомобиле установлен любой из указанных оригинальных номеров
KTR1326 KTR1331	568203B000 568201C080	Для данной комплектации автомобиля предусмотрено два невзаимозаменяемых артикула KYB, выбор корректного артикула KYB нужно осуществлять в зависимости от установленного оригинального артикула (из перечисленных)
KTR1242 -	4504729075 4504709010	Для данной комплектации существует несколько невзаимозаменяемых между собой артикулов, предложение KYB есть не для всех оригинальных артикулов, перечисленных в правом столбце
KBJ1021	D65134350* D65134350B* D65134350C*	Артикул KYB является составной частью всех указанных оригинальных номеров (например, шаровая опора KYB для оригинального рычага подвески), если на автомобиле установлен один из указанных оригинальных номеров, артикул KYB подойдет в качестве его составной части.

Обозначения в каталоге:

Страна установки:

FL – передняя левая (для стоек стабилизаторов и шаровых опор)

FR – передняя правая (для стоек стабилизаторов и шаровых опор)

FL (U) – передняя верхняя левая (для шаровых опор)

FR (U) – передняя верхняя правая (для шаровых опор)

RL – задняя левая (для стоек стабилизаторов и шаровых опор)

RR – задняя правая (для стоек стабилизаторов и шаровых опор)

L – левый (для рулевых тяг и наконечников)

R – правый (для рулевых тяг и наконечников)

L/R – деталь KYB применяется как на левую, так и на правую сторону (для рулевых тяг и наконечников)

I (L/R) – внутренний наконечник тяги (для рулевой трапеции)

O (L/R) – внешний наконечник тяги (для рулевой трапеции)

Комплектация:

2WD – автомобили с приводом на одну ось

4WD – полноприводные автомобили

4 wheel steering – автомобили с полноуправляемым шасси

Manual steering – автомобили без усилителя рулевого управления

Power steering – автомобили с усилителем рулевого управления

Electric power steering – автомобили с электроусилителем рулевого управления

Hydraulic power steering – автомобили с гидроусилителем рулевого управления

Manual transmission – автомобили с механической КПП

Automatic transmission – автомобили с автоматической КПП

Sedan – тип кузова – седан

3 door – тип кузова - 3-х дверный хэтчбек

5 door – тип кузова - 5-и дверный хэтчбек

Wagon – тип кузова – универсал

Cabrio – тип кузова - кабриолет

RUS make, USA make, UK make, TR make, Japan make, Canada make – автомобили, произведенные в России, США, Великобритании, Турции, Японии и Канаде соответственно

RUS spec, EU spec, Asia spec, Africa spec, Middle East spec – спецификация автомобиля для России, Европы, Азии, Африки, Ближнего Востока соответственно

Cold climate spec – спецификация для холодных климатических условий

Tropical spec – спецификация для жарких климатических условий

Exc. – «**кроме/исключая**» - подходит для комплектаций, кроме перечисленного после Exc.

Incl. – «**включительно**» - подходит для комплектаций, включая перечисленное после Incl.

Using of catalog

Information which is represented in this catalog (including KYB-OEM cross lists) is valid only for EACU countries (Armenia, Belarus, Kazakhstan, Kyrgyzstan, Russia). There are left-hand drive vehicles and right-hand drive vehicles represented in this catalog (right-hand drive vehicles originally produced for Japan domestic market indicated as "JDM" after brand name).

The data on the applicability of KYB PNs by brands, models and equipment presented only for general reference, the correct selection of the KYB PN must be checked according to OEM PN indicated in the catalog and cross-lists. If there is a discrepancy between the information on the applicability of the KYB PN by brand / model and OEM PN, OEM PN takes precedence. The selection of the KYB PN is also considered correct if the brand, model or equipment of exact car is not represented in catalog, but OEM PN selected for this car is present in the catalog or cross-lists. The selection of a KYB article only by make, model and equipment (without checking OEM PN) is not correct.

Options for KYB PN indication in catalog (examples):

KTR1105	53540SWAA01 53540SWAA02	For this application, KYB PN is suitable if any of the specified OEM PNs is installed on the car.
KTR1326 KTR1331	568203B000 568201C080	For this application, there are two non-interchangeable KYB PNs, the choice of the correct KYB PN must be carried out depending on the installed OEM PN (from the listed ones)
KTR1242 -	4504729075 4504709010	There are several non-interchangeable OEM PNs for this configuration, the KYB offer is not available for all OEM PNs listed in the right column
KBJ1021	D65134350* D65134350B* D65134350C*	The KYB PN is an integral part of all the specified OEM PNs (for example, the ball joint KYB for OEM suspension arm), if one of the specified OEM numbers is installed on the car, the KYB part will be suitable as an integral part of it.

Catalog's legend:

Installation side:

FL – front left (for stabilizer links and ball joints)
FR – front right (for stabilizer links and ball joints)
FL (U) – front left upper (for ball joints)
FR (U) – front right upper (for ball joints)
RL – rear left (for stabilizer links and ball joints)
RR – rear right (for stabilizer links and ball joints)
L – left (for tie rods and rack ends)
R – right (for tie rods and rack ends)
L/R – KYB PN could be used both for left side and right side (for tie rods and rack ends)
I (L/R) – inner tie rod
O (L/R) – outer tie rod

Vehicle equipment:

2WD – 2 wheel drive
4WD – 4 wheel drive
4 wheel steering – 4 wheels steering vehicles
Manual steering – vehicles without assisted steering
Power steering – vehicles with power assisted steering
Electric power steering – vehicles with electric power assisted steering
Hydraulic power steering – vehicles with hydraulic power assisted steering
Manual transmission – vehicles with manual transmission
Automatic transmission – vehicles with automatic transmission
Sedan – body type – 4 door sedan
3 door – body type – 3 door hatchback
5 door – body type – 5 door hatchback
Wagon – body type – wagon (estate)
Cabrio – body type – cabriolet
RUS make, USA make, UK make, TR make, Japan make, Canada make – vehicles made in Russia, USA, UK, Turkey, Japan and Canada respectively
RUS spec, EU spec, Asia spec, Africa spec, Middle East spec – vehicle's specification for Russia, Europe, Asia, Africa and Middle East respectively
Cold climate spec – vehicle's specification for cold climate countries
Tropical spec – vehicle's specification for tropical climate countries
Exc. – applies to vehicles, except listed after Exc.
Incl. – applies to vehicles, including equipment listed after Incl.

The background of the entire page is a complex, abstract geometric pattern composed of numerous triangles. These triangles are primarily shades of red, from light salmon to dark maroon, and are arranged in a way that creates a sense of depth and movement. They form a large, irregular polygon that covers most of the page.
